WINDOWS & DOORS

WINDOWS • CASEMENT • VERTICAL SLIDER • FLUSH SASH • TILT & TURN • FULLY REVERSIBLE

LET US **INTRODUCE** OURSELVES

Your home is your castle, so investing in such a major part of it, such as replacement doors and windows, can be as daunting as it is exciting.

With millions of installations over 20 years, our network's 97% customer satisfaction rating is a true reflection of the passion, dedication and experience our members provide to homeowners.

OPENING UP WINDOWS OF OPPORTUNITY

Your current doors or windows may not suit you for many reasons. Difficult to reach handles, tricky or insecure locking mechanisms and poorly maximised natural light are all common problem areas.

A variety of colours and finishes to choose from, as well as multiple frame shapes and hardware options,

INTRIGUED? DON'T JUST TAKE OUR WORD FOR IT...

High standard of workmanship across every project, no matter how big or small...

“Great products, friendly workmen, no hassle service, delivery and installed on time – highly recommended.”

Mrs Boxall

“Excellent service from enquiry to fitting. No pressure sales. Good advice, friendly, professional and efficient at every stage. Very pleased would highly recommend.”

Mrs Butterworth

“Would recommend these guys to anybody, the service they offer is faultless. Everything ran smoothly and to timing and they really do offer quality products. I'll certainly be using again in the near future.” Mr Martin

CASEMENT WINDOWS

The most popular and versatile style of window that we offer. Suited for both traditional and contemporary homes, they bring endless possibilities of choices and options.

With a choice of fixed or opening frames, colours, finishes and hardware, your windows can be as unique as your home is.

Discuss which design of casement window

would suit your home and needs best – the combinations are endless.

Leaded or chamfered glass are often fitted to top openers to enhance the look of these windows.

As with all VEKA uPVC windows, casement window maintenance is minimal. An occasional wipe with soapy water and a drop of oil on the hinges will keep your windows looking good and functioning well.

KEY FEATURES

- Simple, versatile and user-friendly design
- Available as fully sculptured or chamfered
- Option of top or side openings
- Enhances warmth and security
- Long life and low maintenance
- High security locking systems
- Energy efficient
- Wide range of colours and glazing options
- comprehensive ten year insurance-backed guarantee
- Manufactured using VEKA Group profile
- Low maintenance
-

VERTICAL SLIDER WINDOW

Indulge in the timeless appeal of traditional timber sash windows, yet benefit from the innovations found in modern windows. VEKA Group's Vertical Slider Windows deliver the best of both worlds, including a dual opening function that adds easy cleaning and further ventilation to the list of benefits.

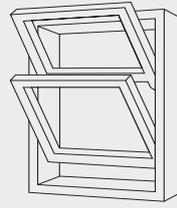

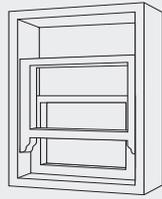

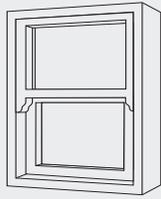

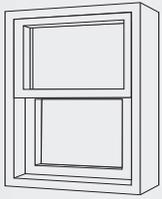

From the outside, it's difficult to determine this modern alternative from the original timber windows, yet the maintenance usually associated with such beautiful features is virtually non-existent with Vertical Slider Windows. With the ability to tilt as well as slide, these windows also offer years of life with little intervention. uPVC construction results in a window that doesn't rot, swell or warp, while never needing repainting.

Energy efficiency is an ongoing battle with many older properties, with potentially ill-fitting single-glazed windows being a major source of heat loss.

Replacing your traditional timber sash windows with Vertical Slider Windows virtually eliminates this issue, reducing the money you spend on heating your period home.

They can also reduce the level of exterior noise and draughts that penetrate your home, leaving you to enjoy a peaceful warm haven. Many period properties are subject to stricter planning regulations, particularly if situated in conservation areas.

The style of VEKA Group's Vertical Slider Windows mirrors that of the originals, complete with the optional 'horns' featured on many of their timber counterparts.

KEY FEATURES

- Traditional timber window look
- Slide or tilt function for easy cleaning and ventilation
- Improved heat retention
- High security locking systems
- Low maintenance
- Energyefficient
- Manufactured using VEKA Group profile
- Optional sash horns and a wide range of colours and glazing options
- comprehensive ten year insurance-backed guarantee
-

A range of style and colour options enable you to configure your new windows to replicate your originals, while sympathetically blending with your internal style or colour scheme.

FLUSH SASH WINDOWS

The perfect replacement window for period properties, FlushSash Windows deliver a blend of traditional styling with the efficiency and performance you'd expect from modern windows. The simple classic lines deliver an undeniably authentic look, while the contemporary uPVC frames, featuring double or triple glazing, offer outstanding energy efficiency.

Heritage properties tend to have appealing character features that remain popular through the ages.

Unfortunately there are drawbacks of such properties, including energy inefficiencies such as draughts and damp associated with ill-fitting and single glazed windows.

Fitting FlushSash Windows can overcome these issues often associated with beautiful older houses by providing modern levels of warmth and energy efficiency, and reducing your energy bills.

uPVC construction also results in a window that doesn't rot, swell or warp, while never needing repainting.

Alongside the warmth and comfort achieved by fitting new windows to a period property, sound insulation is also an added benefit.

In conservation areas, there is often a requirement for homeowners to replicate original windows closely. The clean, simple lines of FlushSash Windows make them a suitable option for such houses.

KEY FEATURES:

- Traditional lines
- Simple and easy to use
- Versatile design
- Long life and low maintenance
- High security locking systems
- Energy efficient
- Manufactured using VEKA Group profile
- Wide range of colours and glazing options
- comprehensive ten year insurance-backed guarantee

Tailor-made for each property, the windows achieve both a physical and visual fit. With the option to specify different colours for the interior and exterior frames, you can complement your interior colour scheme while attaining a more traditional exterior look.

Impressive security credentials and a ten year insurance-backed guarantee will allow you to enjoy peace of mind from the outset.

TILT & TURN WINDOWS

Tilt & Turn Windows deliver the functionality and clean lines you'd like from new windows, with the security and energy efficiency you'd expect. VEKA Group's team applied years of experience to develop a window design that opens in two different ways while also making cleaning as simple as its operation.

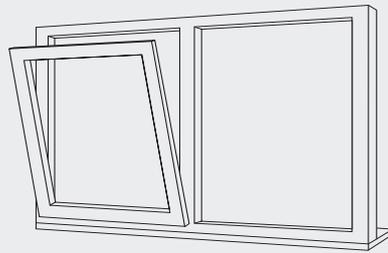

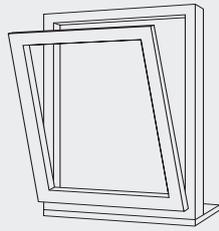

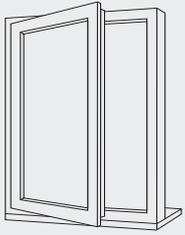

One turn of the handle allows you to tilt the window inwards, then a second turn enables it to open fully inwards for maximum fresh air, an uninterrupted connection to the outside world and ease of cleaning.

When tilted, the windows allow ventilation while minimising the effect of the elements, as well as protecting you from unwanted guests.

Simplicity is core to the exterior view of these windows, with no moving or outward opening parts to break the clean lines of your home.

Available in either sculptured or chamfered design with a number of glazing options, as well as a choice of woodgrain and colour options, there's a Tilt & Turn Window to suit every home.

We make sure the money you spend on energy isn't wasted by expertly installing weather tight windows and doors. Tilt & Turn Windows are accompanied by a ten year insurance-backed guarantee.

KEY FEATURES:

- Open inwards in two ways
- Opens fully inwards for easy cleaning
- Available as fully sculptured or chamfered
- Minimises outdoor noise
- High security locking systems
- Low maintenance
- Energyefficient
- Manufactured using VEKA Group profile
- Wide range of colours and glazing options
- comprehensive ten year, insurance-backed guarantee

FULLY REVERSIBLE WINDOWS

Cleaning windows in multi-storey buildings has never been so easy with VEKA Group's Fully Reversible Windows. Offering no compromise on looks or performance, these revolutionary windows offer unhindered access to both sides of the glazing, and are particularly popular for installation on hard-to-reach upper floors.

The benefits of Fully Reversible Windows are obvious where window cleaning isn't as simple or accessible as in a ground or first floor home. All moving parts of the windows remain outside, making it less likely that window cleaning liquids will drip into your home.

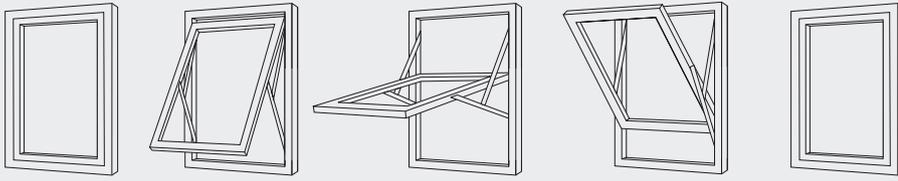

Easy cleaning isn't the only benefit though – infinite levels of ventilation are available thanks to a fully rotating glazing panel, while window blinds can be fitted in the reveal and are therefore not affected by the windows being opened or cleaned.

When closed, the windows deliver exceptional weather resistance and energy efficiency. Offering the same insulation ratings as other products from VEKA Group's double and triple glazed window range, these Fully Reversible Windows are more than just an easy cleaning solution.

Exterior sounds that penetrate your property, such as from busy roads or other transport modes, can be significantly reduced, while warmth remains inside your home, potentially leading to lower energy bills.

Given a wide range of colour and finish options, inside and out if required, you can complement both your exterior and interior design schemes. This is particularly useful where you may have to conform to design regulations in a multiple occupancy building.

As with all installations all Fully Reversible Windows come with a ten year insurance-backed guarantee so you can rest assured you're covered against any future problems.

KEY FEATURES:

- Entire window can be turned back on itself for easy cleaning, while protecting your blinds and curtains
- Ideal for externally inaccessible windows, with built in two stage restriction
- Long life and low maintenance
- Strong and secure
- High security locking systems
- Energyefficient
- Wide range of colours and glazing options
- comprehensive ten year insurance-backed guarantee
- Manufactured using VEKA Group profile

HARDWARE, LOCKS & HANDLES

From the overall finish to the individual touches that make them a pleasure to look at and use, we want you to be happy with your new windows and doors.

Your chosen member has a high quality selection of hardware that has all passed the toughest industry tests with flying colours, proving its durability in the same way we expect our windows and doors to do.

Handles, chains, hinges, numbers and letterplates are available in chrome, gold, white, black and many more colours to complement the wide choice of finishes on our windows and doors.

Make your new window and door truly yours with some individual finishing touches.

COLOURS

Whatever colour you choose, you can rest assured that your new frames come with all the quality, energy-efficiency, guarantees and low maintenance.

You can even choose one colour for the inside and one for the outside; they're tailor-made for you to match your home. Whichever combination your frames will stand the test of time thanks to the ten year insurance-backed guarantee.

If you have a colour in mind that you can't see here please ask - VEKA offer a wide range of bespoke colours that are tailored to meet each customer's needs.*
